PROFESSIONAL SUMMARY

ANAN-certified accountant turned Data Analyst, with 14 years of making financial numbers right and a portfolio of Power BI dashboards that turn business data into clear decisions. Skilled in Power Query, DAX, star-schema data modelling, SQL, Python and Excel. Validates every figure against the source before it reaches a report: on a 1,000,000-row retail project this caught 48 of 50 mis-mapped campaign keys and a churn-risk measure showing 100% instead of 10%. Brings a finance professional's understanding of revenue, cost and cash flow to analytics, and explains findings in plain business language. Open to remote Data Analyst, Business Intelligence and Financial Data Analyst roles.

TECHNICAL SKILLS

- **Business Intelligence:** Microsoft Power BI (DAX, Power Query, data modelling, star schema), interactive dashboards, KPI reporting
- **Data & Programming:** SQL (MySQL), Python
- **Spreadsheets:** Microsoft Excel (pivot tables, VLOOKUP/XLOOKUP, dashboards)
- **Data Quality:** Data cleaning, data validation, reconciliation of reports to source data
- **Analysis:** Data visualisation, sales and campaign analysis, churn analysis, customer segmentation
- **Finance:** Financial analysis and reporting, management accounts, financial statements, bookkeeping, account reconciliation, internal controls
- **Professional:** Communication, teamwork, attention to detail

PROFESSIONAL EXPERIENCE

Data Analyst (Portfolio Projects) | Self-employed, Remote **Present**

- Build end-to-end analytics projects in Power BI, SQL, Python and Excel, covering data cleaning, data modelling, DAX measures, interactive dashboards and project documentation.
- Validate every KPI against source totals before reporting, and write up findings and recommendations in plain business language.
- Delivered a retail sales dashboard (1,000,000 transactions) and a telecom customer-retention dashboard (7,043 customers); details under Projects.

Freelance Accountant | Self-employed, Akure, Ondo State **2015 – Present**

- Maintain clients' books of account, from daily transaction posting to month-end close.
- Prepare monthly management accounts and annual financial statements.
- Reconcile bank, cash, customer and supplier accounts and clear differences before reporting.
- Build Excel workbooks that track sales, expenses and cash flow.
- Prepare schedules and working papers for external auditors at year-end.

Accountant | RoyalGate Marketing Ltd, Abeokuta, Ogun State **2012 – 2015**

- Maintained the books of account, from daily transaction posting to month-end close.
- Prepared monthly management accounts and annual financial statements for the directors.
- Reconciled bank, cash, customer and supplier accounts every month.
- Prepared schedules and working papers for the external auditors at year-end.

Audit Intern | Fola-Ade & Co, Ibadan, Oyo State **2011 – 2012**

- Assisted in preparing clients' financial statements for audit.
- Supported audit planning and tested internal controls.
- Prepared and organised audit working papers and documented findings.
- Helped draft audit reports for review by the engagement partner.

PROJECTS

Retail Sales Analytics | Power BI, Power Query, DAX

1,000,000 transactions (Jan–Dec 2024): 500 stores, 50 US cities, 210 products, 100,000 customers, 50 campaigns

- Cleaned the raw data in Power Query and built a star-schema model: a sales fact table with customer, product, store, salesperson, campaign and date dimensions.
- Wrote DAX measures for revenue, orders, average order value, month-on-month and quarter-on-quarter growth, churn-risk share and campaign performance; designed a two-page interactive dashboard.
- Validated the model against the source and caught three errors before reporting: 48 of 50 campaign keys mapped to the wrong campaign, a “distinct customers” measure counting rows, and churn risk showing 100% instead of 10%.
- Reported $2.75B in revenue, an average order value of $2,750.87 and 99,996 active customers; Q3 was the strongest quarter ($940M, 34% of the year) and October the best month ($423M).
- Showed that revenue tracked the number of live campaigns (r = 0.75) while each campaign brought in about $55M regardless of budget, so campaign timing mattered more than spend.

Customer Retention Analytics (Telecom Churn) | Power BI, Power Query, DAX

7,043 customer records, 61 columns

- Prepared the data in Power Query and added segmentation columns for tenure groups, satisfaction bands, charge tiers, CLTV tiers and a churn flag.
- Built 40 DAX measures in a dedicated measures table (churn and retention rates, early churn, revenue lost, high-risk active customers, city rankings) and two report pages with slicers for contract, payment method, tenure, offer and internet type.
- Reconciled every KPI to the source file: no duplicate customers, and churn counts agree across three columns.
- Measured 26.5% churn (1,869 customers), losing $139,131 a month: 30.5% of monthly billing, or about $1.67M a year.
- Identified the drivers: month-to-month contracts churned at 45.8% against 2.5% on two-year contracts and made up 88.6% of churners; 55.5% of churners left in their first 12 months; Fiber Optic customers churned at 40.7%; 45% left for a competitor and only 11.3% over price.

EDUCATION & CERTIFICATIONS

Professional Certification | Association of National Accountants of Nigeria (ANAN), Credential ID 62986 **Dec 2025**

Higher National Diploma (HND), Accounting | Kwara State Polytechnic, Ilorin **2008 – 2010**
